(540) 597-5447 · Richmond, VA

Design engineer who works across **visual design, frontend craft, and product thinking**, shipping interfaces end-to-end, from type, spacing, and interaction detail to production React.

EXPERIENCE

The Washington Post

Staff Software Engineer

Aug 2025 - Present

- Design and own the React component ecosystem (70+ packages) for Arc XP, the Post's publishing platform, defining the look and feel of hundreds of sites at hundreds of millions of monthly pageviews.
- Built visual regression testing with Playwright and Chromatic into the deploy pipeline, holding a consistent visual bar across the whole system.
- Built an LLM-driven UI generation workflow (AWS Bedrock, Lambda) that turns structured inputs into five production-ready frontend artifact types in under a minute.

Senior Software Engineer

Apr 2022 - Aug 2025

- Designed a 3-layer design-token pipeline (global primitives, semantic aliases, breakpoint overrides) that compiles JSON definitions into production CSS across the design system.
- Designed and built the homepage, footer, and search UI for dev.arcxp.com, a public developer documentation site.
- Added keyboard navigation, ARIA, and RTL support throughout the component library.
- Led a 4-person team to design and build an internal developer Community Hub, setting the vision and providing design and technical direction from wireframes through delivery.

Software Engineer

Jun 2021 - Apr 2022

- Restyled Arc's developer documentation typography and formatting for readability, wireframed an internal launch-operations site, and ran launch-gate code reviews for 7 client site launches.

IBM

Technical Consultant → Senior Technical Consultant

Sep 2017 - Jun 2021

- Served as UX designer and frontend engineer for a U.S. Navy research analysis platform, owning the interface end-to-end from proof-of-concept wireframes to production React components.

SELECTED PROJECTS

HYBRD [view →](#)

Wireframed and prototyped a fitness app in high fidelity (accepted into Y Combinator), then shipped a production React Native feature with a custom animation component.

Figma Design Token Exporter [view →](#)

Open-source Figma plugin that translates Figma Variables into Arc XP's token bundle format, connecting design-system definitions directly to production token architecture. Designed and shipped solo.

EDUCATION

University of Virginia

B.S. Systems Engineering · B.A. Economics

SCHOOL OF ENGINEERING · 2017

TOOLKIT

DESIGN

UX/UI design, Figma, design systems, typography, wireframing, Illustrator

ENGINEERING

React, TypeScript, CSS/Sass, Storybook, Chromatic, animation
